

Group 09 – Washington Co., GA – Original Surname Probably Hutchinson

~~G02.117212[25A-6B] Robert Bland (C1708-1760) of Prince William and Loudon Cos. VA.~~

~~G02.1172122[25A-6B(2)] Robert Bland (C1732-1787) VU, pp. 496-501~~

G02.11721227[25A-6B(2g)] Elisha Bland (1775-1836) AC 6-1, pp. 21-24; AC
19/20 pp. 77-100.

DNA of descendants of Elisha's sons, Simeon & John, match each other, but do not match the **Group 02** Bland DNA; therefore either Elisha was not a Bland (although his birthdate DOES appear in Darwin Bible record) or these two sons were not his. (Was Elisha's wife a widow?) Though traditional genealogical research suggests the first two individuals below belong with **Group 02**, DNA has proved otherwise. In fact, research in 2014 by a group of individuals descended from this line uncovered pretty strong evidence that the most distant ancestor for this group was Andrew Hutchinson (b. 1687) through one of his 8 or 9 sons in Loudoun Co., VA. This research was successful in finding the birth father of the third participant listed below, John David Underwood.

DNA participants in this group are:

Kit #83364 (This participant is no longer in the Bland DNA Project)

Frederick Hemming Bland, IV

John David Underwood
