

Ungrouped Participants

The following DNA participants will not be assigned group numbers for various reasons.

The first two participants came to us from the National Geographic DNA Project with only 12 markers. They did not respond to any attempts to inquire about their family lines. None of the four participants match anyone currently in the Bland DNA Project.

Kit #N30385

Kit #N31434

Billy Dan Bland (also see Group 11)

Steven Eric Bland (matches with Turnbull or Trimble)
